DRM – RECEIVER UPDATE
HFCC Conference B11, Dallas – 13 Sep 2011
Ludo Maes – TDP, Belgium
Portable DRM30 receivers available on the market

Himalaya DRM 2009
- € 199,00

Morphy Richards DRM 27024
- € 79,00

Technisat MultyRadio
- € 149,00

Uniwave Di-Wave 100
- € 249,00
Car DRM30 receivers available on the market

StarWaves CarBox

€ 229,00

€ 249,00

Demonstrator Receiver
New DRM car receiver

Prototype of DRM car receiver based on NXP Semiconductors chipset
Chipset developments

More and more chipsets for digital radio are being developed and more functionality is being integrated in the chipsets.

At this moment, most solutions offer a separate RF front end and baseband IC, but the tendency is to integrate these 2 into a single-chip solution integrating other components as well.

This results in smaller solutions for DRM receivers and also in an important price reduction for DRM receivers.
Thanks!
